COUNTERPATH

X-Lite welcomes you to the world of softphones!

Combining voice calls, video calls and Instant Messaging in a simple interface, CounterPath's X-Lite helps you seamlessly transition from a traditional phone environment into the world of Voice over IP.

The latest release of X-Lite provides a completely redesigned interface that allows for a contact-centric or dialpad-centric user experience, or a combination of the two. It also provides you with **some of the most popular features of our fully loaded Bria and eyeBeam softphones** so you can take them for a test drive before you make your purchase.

Whether you're having a simple voice conversation, saying hello to loved ones over video or chatting with friends over IM, you'll soon see why having a softphone on your desktop or laptop is the ultimate communications experience.

Important Notice

X-Lite does not include a service. You must have a SIP IP-PBX or VoIP service provider to use with X-Lite.

Notice

Please note that we do not offer support for our free product, X-Lite. If you need help, please visit the X-Lite Forum or FAQ page.

Place a Test Call

Place Your First Call!

You should be all set to place your phone call using your 2talk account and X-LITE 4.

1. Type in the phone number you would like to call, the same way you would type it into your phone.
2. Hit the CALL Button to the right.
3. If you've set everything up correctly, your call will be connected.
4. Now you can start 2talking on your softphone!
