

Customer Care Program

2talk understands that you are focused on running your business and need your phone system to just work. A service included with every system 2talk sells, the 2talk Customer Care Program was developed to ease the transition to your new phone system and avoid potential pitfall and challenges.

Customer Care Program Benefits:

- Complementary program enrollment with every system
- Get up and running faster with full installation support
- Improve adoption with user-type training
- Specialized care assistance with active monitoring
- Priority support and escalation

Every step of the way.

Designed to get you up and running faster, the Customer Care Program assigns a 2talk Care Specialist to assist you through every step of setup and installation, as well as monitor and offer specialized assistance your first month of service.

- **Installation Assistance & Support**
2talk wants to ensure timely and successful installation of your new 2talk service. Get personal, one-on-one assistance from a live Customer Care Specialist who will walk you through every step of the installation process, and ensure your system is up and running at the end of your appointment.
- **Basic Configuration & Training**
2talk wants you to get the most out of your 2talk business phone system. At the time of your installation appointment, 2talk will walk you through basic business rule configurations.
Depending on your 2talk deployment, 2talk also offers specialized user training for call center managers and agents, executive and managers, and or regular end-users. This ensures not only successful installation, but helps end-user adoption to speed implementation.
- **2talk Care Assistance**
Complete customer satisfaction is our goal. That is why 2talk will continue to actively monitor your account after the initial installation process.
A 2talk Customer Care Specialist is assigned to every account and actively monitors user, technical support issues, and any escalations during the first 30 days of service.
